

The Greatest Nuclear Risks

Prof. Siegfried Hecker
Center for International Security
and Cooperation (CISAC)
Stanford University

Tuesday
May 11, 2010
7:00 PM

Admission: Free

Hewlett Teaching Center, 201
(1.5 blocks west of The Oval)
Stanford University

With the end of the Cold War, the danger of a full-scale nuclear war has been eclipsed by the specter of nuclear terrorism and the potential for a regional nuclear war.

Come hear one of the world's leading experts on nuclear weapons present his views on the greatest risks we face, why Pakistan is at the top of the list, and what we must do to manage those risks.

Sponsored by Stanford University's
Department of Electrical Engineering

Co-sponsors:

League of Women Voters of Palo Alto
Los Altos Voices for Peace
Multifaith Voices for Peace and Justice
Nuclear Age Peace Foundation, Silicon Valley

Prof. Siegfried Hecker is Co-Director of Stanford's CISAC, professor (research) in the Dept. of Management Science and Engineering, and Director Emeritus of the Los Alamos National Laboratory.

He has visited Russia forty-one times, North Korea six times, as well as China, India, and Kazakhstan as part of his efforts to defuse the danger posed by nuclear weapons.

This is the fifth in a series of free public lectures at Stanford on Defusing the Nuclear Threat. For more information, see <http://TinyURL.com/ycwgpdo>.
